

DEVRIM SAVAS YILMAZ

Backend-focused Full-stack Developer

Drammen, Norway | +47 450-01-349 | devrimsavasyilmaz@gmail.com | [GitHub](#) | [LinkedIn](#)

SUMMARY

Backend-focused full-stack developer (.NET/C#, Node.js, React/Next.js) with a lifelong curiosity for how things work under the hood: from handcrafting a 4-bit CPU emulator from scratch in my spare time, to shipping full-stack and microservice projects in production. Moving from a technical teaching role into industry development, where I improved student pass rates by 70% through hands-on, project-based teaching. Comfortable owning a codebase end to end, from database design to deployment.

EDUCATION

Noroff School of Technology and Digital Media

Back-End Developer Program, Associate Degree

Oslo, Norway

Aug 2023 - Jun 2025

- Full-stack and backend focus: ASP.NET Core, Node.js, React, Docker, Azure.
- Achieved grade A in first year.

EXPERIENCE

JobLoop

Academic Teacher & Course Leader

Oslo, Norway

Nov 2024 - Sep 2025

- Integrated C#, ASP.NET and Node.js into the curriculum, preparing students for industry demands.
- Achieved a 4.7/5 student satisfaction rating through targeted teaching and individual follow-up.
- Increased pass rate by 70% through personalized academic support.
- Mentored 30+ students individually and led 5 career development workshops.

Noroff School of Technology and Digital Media

Backend Coach

Oslo, Norway

Sep 2023 - Jun 2025

- Delivered learning sessions that increased student skill levels by 40% on final assessments.
- Developed tailored learning modules in C#, ASP.NET and Node.js.
- Maintained a 95% positive feedback rate from mentees.
- Dedicated 5 hours weekly to individual code support and problem solving.

PROJECTS

NorskHandverk – Full-stack E-commerce Platform

.NET 9, Next.js 16, PostgreSQL, Stripe

Feb 2026 - Present

- Built a complete e-commerce solution with Stripe payment integration, including an idempotent checkout flow that prevents duplicate charges and webhook handling for the full payment lifecycle.

NOVAMED – Clinic Appointment Booking System

ASP.NET Core 8, Next.js 14, MySQL

May 2025 - May 2025

- Built a full-stack appointment booking system with role-based interfaces for patients, doctors, staff and admins, including calendar integration and doctor search.

ETL & Microservices with Power BI Visualization

Node.js, MSSQL, Power BI, GitHub Actions

Sep 2025 - Sep 2025

- Designed an ETL pipeline and microservice architecture over a shared SQL database, with automated CI testing and business analytics visualized in Power BI dashboards.

RabbitStock – Event-Driven Microservice System

TypeScript, RabbitMQ, React, Docker

Oct 2025 - Oct 2025

- Built asynchronous order/inventory management using a RabbitMQ fanout exchange, with services communicating via message queue instead of direct API calls, including automatic stock validation and order confirmation/rejection.

BIT4 – Handcrafted 4-bit CPU Emulator

C#, WinForms

Jun 2026 - Present

- Personal project: built a complete 4-bit computer architecture from scratch: custom CPU, ALU, graphics processor and assembler, no frameworks. Ongoing work connecting the emulator to physical Arduino hardware.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, Python, Java

Frameworks: ASP.NET Core, Node.js/Express, React/Next.js, Spring Boot, Flask

Databases & Messaging: SQL, PostgreSQL, MySQL, MongoDB, SQL Server, Redis, RabbitMQ

Architecture & APIs: Microservices, REST API, WebSockets, Socket.IO, GraphQL, JWT, Swagger/OpenAPI

Frontend Styling: Tailwind CSS, Bootstrap

Cloud & Tools: Docker, CI/CD, AWS, Azure, Git

Testing: Unit Testing, Jest, Supertest, Cypress (E2E)

Methodologies: Agile/Scrum

Currently Learning: Kotlin, Google Cloud Platform (GCP), Terraform (IaC)
